29.4. **Stop-Loss Orders:** An order to close a position when the market reaches a specified price, designed to limit potential losses. A stop-loss order becomes a market order once the stop price is triggered, and execution is subject to market conditions and slippage.

29.6. The Company executes orders on an "execution-only" basis. We do not guarantee specific prices or fill rates, especially during periods of high volatility, low liquidity, or market gaps.

31.2. The Company sets margin requirements for each Financial Instrument, which are subject to change without prior notice.

31.3. **Margin Call:** If the Client's Account equity falls below the required margin level, the Company may issue a margin call. The Client is responsible for monitoring their margin levels.

31.4. **Stop Out Level:** If the Client's Account equity falls to a specified "stop out level" (typically 50% of margin), the Company reserves the right to automatically close any or all of the Client's open positions without prior notice to prevent further losses. The stop-out level is specified on the Company's Website.

32. Slippage

32.1. The Client acknowledges that slippage may occur, particularly during periods of high volatility, market gaps, or news events.

32.2. Slippage means that an Order is executed at a price different from the requested price. This can result in either a better or worse execution price for the Client.

32.3. The Company is not liable for losses incurred due to slippage.

- Canceling any profits obtained from such activities
- Closing any open positions
- Suspending or terminating the Client's Account
- Charging administrative fees
- Reporting the activity to relevant authorities

34. Negative Balance Protection

34.1. The Company provides Negative Balance Protection to eligible retail clients, which means that under normal market conditions, the Client's losses on their trading account will not exceed their deposited funds.
